The Art Garage provides a community arts education program and gathering space that gives access to the rich world of creative expression while supporting cultural, social, and educational diversity.

The Art Garage is a nonprofit that offers high-quality art education classes taught by local professional artists. Students are able to explore creative art materials, learn and demonstrate art techniques, and design original artwork. Students learn fundamental art elements, art vocabulary, artistic styles, about famous artists and much more! Class sizes are small, typically from 4-15 students, allowing the teacher to work individually with each student.

School Day Out Camps provide a day filled with fun art creation and education!
